#### BFC824 Split Design

Two Way 8.5 x 13.6 (Split Horizontally)

Two Way 8.3 x 13.2 (Split Vertically)

Four Way 12 x 19.3

### BFC821 – Window

This is a traditional window set as our other windows have been. The designs are stitched on individual pieces of fabric and then seamed together.

### BFC822 – Meshed Window

This type of Window is new to BFC. The 12 designs that make up the window are designed to be stitched on one piece of fabric.

### BFC823 – Single Design

This set has three designs each of which will stitch a complete picture. These are for very large hoops or to be used to split for those hoops that require splitting and rotating. If you purchase this set with the intention of splitting, be sure you have the software necessary to work for your machine.

### BFC824 – Split Design

This set is designed to stitch in most of the larger hoops now on the market. You have the choice of doing a two way split horizontally across the picture (for the more square type hoops), a two way split vertically (for tall narrow hoops) and a 4 way split design which will give you a large finished picture.

### RESIZING/CROPPING SERVICE

This service is available for sets 823 and 824. If the designs in the set are not quite the right size for your hoop, you can request having one of the designs resized for a \$10 fee. The cropping feature would apply if you are trying to fit a design into a specific size frame. On this particular picture, I can crop quite a bit from the top and bottom without taking away from the overall effect. The fee only applies once to have a design both resized and cropped.

You will receive necessary instructions with your designs. Since there are no refunds or exchanges, please contact me first if you are not sure which set to purchase.

If you have any questions while making your picture, please don't hesitate to contact me.

Thank you, Suz
